

YENİ

(Triticum aestivum L.)

MINERVA®

■ **Yüksek verimli**

High yield

■ **Üstün kaliteli**

Outstanding quality

■ **Yatmaya toleranslı**

Tolerant to lodging

■ **Hastalıklara toleranslı**

Tolerant to disease

KARAKTERİSTİK ÖZELLİKLER *Characteristic Features*

GELİŞME TABİATI Seasonal type	Alternatif Alternative
---	----------------------------------

OLGUNLAŞMA Maturity	Orta Medium
-------------------------------	-----------------------

BİTKİ BOYU (cm) Plant height	100 - 105
--	------------------

BİN DANE AĞIRLIĞI (g) 1000 Kernel weight	40 - 45
--	----------------

HEKTOLİTRE (kg/hl) Hectoliter	80 - 82
---	----------------

DANE RENGİ Grain color	Kırmızı Red
----------------------------------	-----------------------

BAŞAK TİPİ Spike Type	Kılçıklı Awned
---------------------------------	--------------------------

SERTLİK Hardness	Yarı sert Semi hard
----------------------------	-------------------------------

KALİTE ÖZELLİKLERİ *Quality Properties*

ALVEO ENERJİ (W) Energy	250 - 300
-----------------------------------	------------------

EXT. ENERJİ (CM2) Energy	110 - 140
------------------------------------	------------------

KULLANIM ALANI Main use	Ekmeklik Bread
-----------------------------------	--------------------------

PROTEİN (%)	13 - 15
--------------------	----------------

GLUTEN (%)	35 - 40
-------------------	----------------

PİŞİRME KALİTESİ Baking quality	Çok iyi Very good
---	-----------------------------

HASTALIK TOLERANSI* *Disease Tolerance**

	1	2	3	4	5	6	7	8	9
SEPTORIA SPP									
KÜLLEME Powdery mildew									
SARI PAS Stripe rust									
KAHVERENGİ PAS Brown rust									

*Hastalıklarla mücadelede hastalık şiddetine bağlı olarak gerektiğinde kimyasal mücadele uygulanmalıdır.

*Chemical spraying should be applied when needed.
